Unit testing exercise

(no quiz today!)

Unit testing exercise

Write end-to-end unit tests for the sio application:

- Add student: `/sio/create-student (andrew_id, first_name, last_name)`
- Add course: `/sio/create-course (course_number, course_name, instructor)`
- Registering student: `/sio/register-student (andrew_id, course_number)`
- Sending requests with invalid request parameters.

You should use the Django unit testing `Client`.

- See <https://docs.djangoproject.com/en/1.11/topics/testing/> and its sub-pages for details.

Fix any bugs you find.
